3.49 h.p. Spare Parts Catalogue.

Rules to be observed:

(Important Instructions for tracing Parts will be found on Page 6).

1. It will greatly facilitate prompt attention to clients' correspondence or requirements if letters or goods are addressed to the Company, and to the department concerned.
2. The main departments are as follows:—

New Machines	-	-	Sales Department.
New Machines for Export	-	-	Export Sales Department.
Repairs, Overhauls, or Replacements of Parts under Guarantee	-	-	Repair Department.
Spare Parts	-	-	Spare Parts Department.
Spares Parts for Export	-	-	Export Spare Parts Dept.
Accounts	-	-	Accounts Department.
3. Parts sent to us to be repaired, replaced or as pattern, should bear distinctly the sender's full name and address, and explicit instructions should follow by letter of advice stating specifically what is required.
4. All goods sent as patterns or for repairs must be consigned **CARRIAGE PAID** or we cannot accept delivery of same. Full particulars should also be given as to how the goods are to be returned, whether crated, uncrated, passenger or goods train. This refers only to complete machines or bulky articles, such as engine, frame, wheels. etc.
5. It is **IMPORTANT** that we should be instructed if old parts are required to be returned, as they cannot be held in reserve at our works beyond seven days from date of completion of repair.
6. When forwarding a complete Motor Cycle, do not fail to remove all accessories, such as lamp, horn, tools, badges, etc., otherwise we cannot be held responsible for their safe return, although we take every possible precaution in this respect.
7. When treasury notes or coin is remitted **do not fail to Register the Letter** as otherwise we do not accept responsibility for the correct amount reaching us.

8. Please do not enclose cheques or money of any kind in parcels sent to the Company. All payments should be made through separate post and the amount stated in letter. We accept no responsibility for loss if money is enclosed in Parcels.
9. If the amount remitted is in excess or insufficient, the matter will be adjusted but clients should advise us if any surplus is to be returned or placed to his credit.
10. If parts are urgently wanted and it is necessary to send us a telegram do not fail to include **FULL NAME and FULL ADDRESS** in the message. Unless this is done the Post Office do not give this information in the telegram. Orders or instructions received by telegram or over the 'Phone must be confirmed by letter enclosing remittance.
11. **DESPATCH OF ORDERS**—All goods to Spares Orders, where the maximum weight is under 1 lb. are sent per letter post unless specified otherwise, in order to curtail postage expenses as much as possible, which are borne by the client, although no claim can be made on Post Office if a parcel is lost when sent in this manner.

In the event of loss or damage to goods when in transit whether sent letter post, parcel post or rail, we hold no responsibility whatever, and any claim for compensation must be made by client.

Estimates.

When sending particulars by letter of work to be done to repairs, or when ordering replacements from our Spares Department, may we earnestly request clients not to mix such instructions with other matter. Tell us about your Motor Cycle on **ONE** sheet and give your instructions or Spares order on another, this may then be handed to the department concerned and your instruction will be executed more expeditiously.

We are sometimes asked by clients when sending their Engines or Motor Cycles etc., for repairs or overhauls to furnish an estimate for the necessary work. We are pleased to do this on the distinct understanding that we reserve the right to charge for any extra work or new parts found necessary to put such machine or engine, etc., in good running order, which it may have been impossible to detect when dismantling.

We prefer not to undertake a repair or overhaul (nor do we accept any responsibility) when the estimate for same has been curtailed by the owner.

If an estimate is not accepted after tender, a charge is made for taking down, re-assembling, and preparing the estimate.

All goods returned by us are consigned Carriage Forward.

All letters must be addressed to our Head Offices :

GRAISELEY HOUSE, WOLVERHAMPTON.

A.J.S. Service Agents.

A J.S. Agents who stock Spare Parts are to be found in nearly every town in the United Kingdom, but we have a number who maintain in stock a comprehensive range of parts in accordance with a schedule drawn up by us, and who are **SERVICE AGENTS**.

We supply with this Catalogue a list of our **SERVICE AGENTS** and we advise all owners of A.J.S. Machines to order their requirements from the **AGENT** nearest to them.

Packing Boxes, Crates, etc., are charged at Cost, and are strictly NON-RETURNABLE.

Deposit Accounts.

Customers if they choose may open a deposit account with us, in which event goods to the value of the amount standing to their credit will be despatched when either 'phoned, wired, or ordered by post.

Should a client having a deposit account order Spare Parts from a temporary address, it is advisable to quote, besides his deposit a/c reference, his permanent address.

A statement of account will be rendered periodically to all clients having deposit accounts.

The Prices given in this Catalogue are subject to alteration without notice, and we reserve the right to charge for all parts supplied at prices ruling at time of delivery.

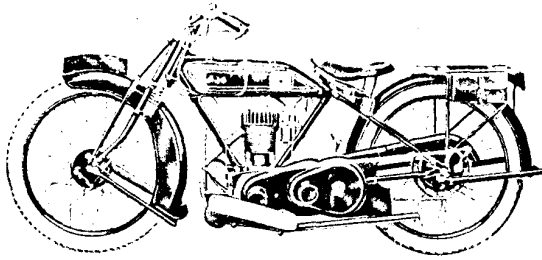

All previous Lists are cancelled and the prices appearing in the Catalogue are current at the date of publication.

Terms.

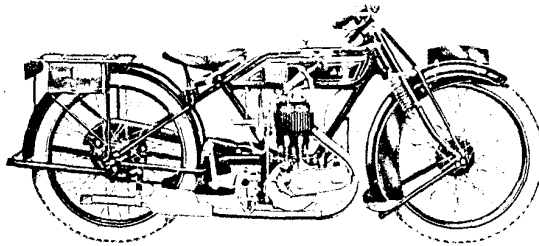

Our terms are strictly **NETT CASH** with order, or Cash against **PRO FORMA INVOICE**.

Cheques and Postal Orders to be made payable to A. J. STEVENS & CO. (1914) LTD. and Crossed.

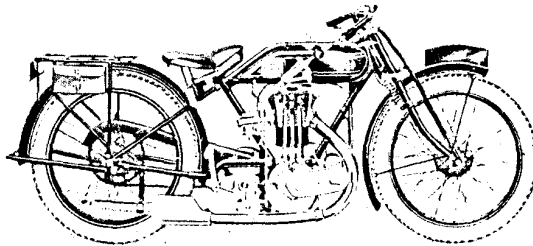

A. J. STEVENS & CO. (1914) LTD.

		" B3.	O.H.V. Sports.
		" B4.	O.H.V. Special Sports.
		" B5.	Side Valve Standard Sports.

IMPORTANT.

Spare Parts Orders.

Please read the following particulars carefully:

All parts in this List are illustrated, numbered, and the various models and years of manufacture shown.

Parts illustrated have one number only. If more than one number is used for any particular type of part, they will be found in numerical order on descriptive pages.

Stars (*) under the various models, in line with number and description, denote the actual model or models for which that part is suitable.

To trace, two courses are available. Firstly, by referring to illustration and noting number. Secondly, by referring to Index which shows section in List under which a certain part or parts are to be found, all similar type parts being grouped.

It is important, of course, that the model and year is known. As an example:—If a crankpin is required for a B1 1923 Side Valve Machine, a star will be found in the column opposite to and in line with Part No. H43 on Page 8. It will also be noticed that the same Crankpin is used on all Side Valve Machines made during 1922, 1923 and 1924.

If replacements are required for Parts not fitted as standard, please give full particulars.

When ordering, give Part Number, Description of Part, Model and Year.

When the Model and Year is in doubt quote Engine Number stamped on Brass Plate on the driving side of crankcase. (See Page 7 for illustration).

Additional Particulars, for Agents only.

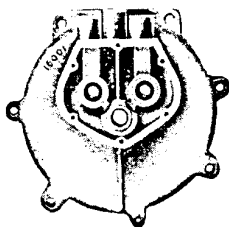

In addition to showing the interchangeability of parts with various models in this List, their interchangeability with similar parts shown in the 1925-27 List is indicated by the same Part Number being quoted. Further than this, the interchangeability of any particular part **in this List with 4.98 h.p. model or models** is indicated by the **4.98 h.p. List Number** being shown in the **4.98 h.p. column** on the descriptive page.

For Example:—If Part No. H289 (which is a Magneto Engine Sprocket), is referred to, it will be found that it is suitable for all models in this List, and on referring to the same number in the 1925/27 List, it shows that it is suitable for all models specified in that List. Against this in the **4.98 h.p. column** the corresponding **4.98 h.p. List Number** G51 is found, and if this number is referred to in the 4.98 h.p. List it will be noticed that it is suitable for all 4.98 h.p. machines. Therefore, Part No. H289 is interchangeable with all 4.98 h.p. models.

The same method is employed in other Lists.

Many small parts in this List are absolutely identical (*i.e.* Nuts, Washers, Screws, Pins, etc.) and are used more than once in the assembly of each machine. These same parts are specified in each of their respective sections, but the same number has been employed throughout. Where any such part is repeated the number (which should be quoted) is shown in brackets.

3.49 h.p. A.J.S. Sidecar Chassis and Body Section.

SPECIAL NOTE.

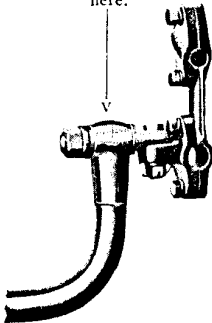

As several types of Bodies are fitted to the Lightweight (Type 2T) Chassis, it has been found necessary, to facilitate the tracing of any particular part, to designate Chassis and Bodies separately, as shown on illustrations and on descriptive pages.

If illustrations are referred to, it will be noticed that the 2T type of Chassis is shown, also each type of Body that has been fitted as standard.

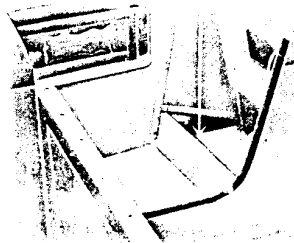

Underneath illustrations is given year or years of manufacture and the designation by which each type is known, therefore, a client should carefully compare his Body with the illustration and description to arrive at the correct type which is fitted to his machine.

All Chassis and Bodies are now being stamped with the type and number as illustrated below, and this information together with the year of manufacture should in all cases be quoted.

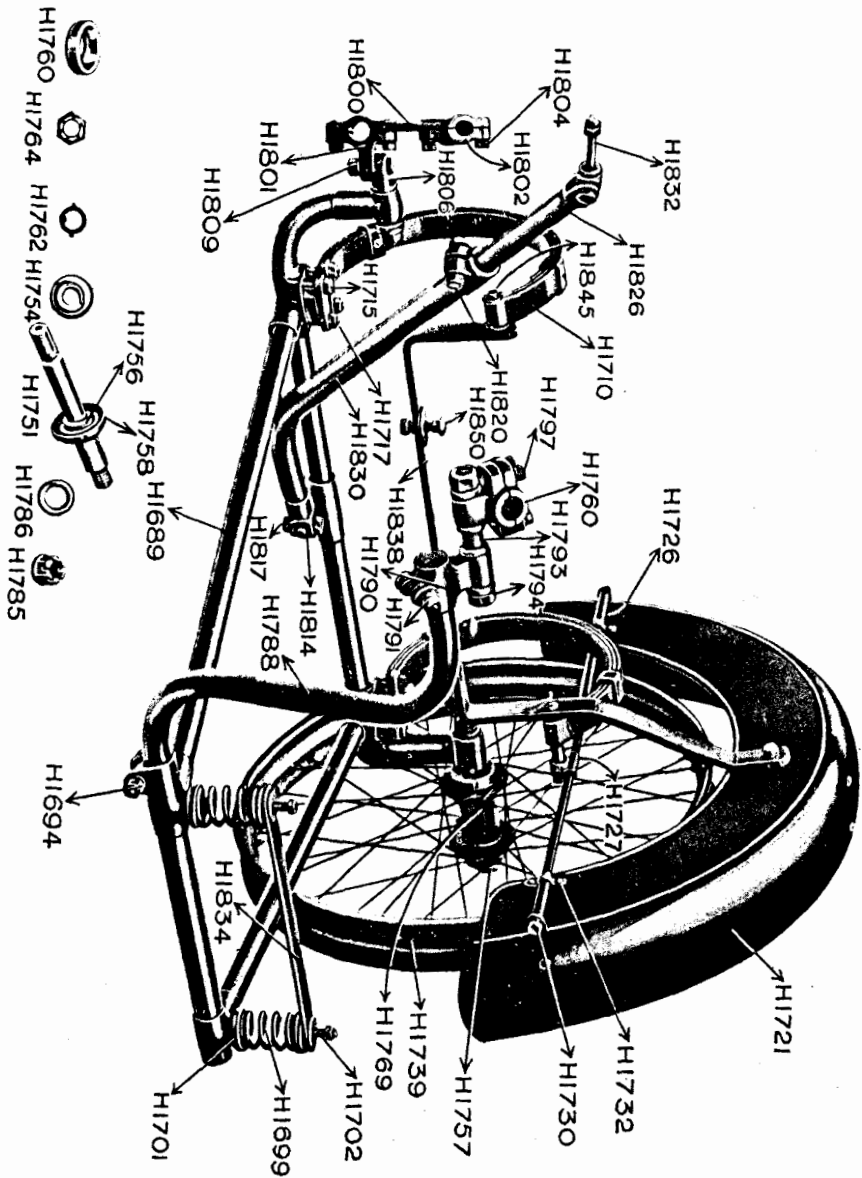

Chassis Type
and Number stamped
here.

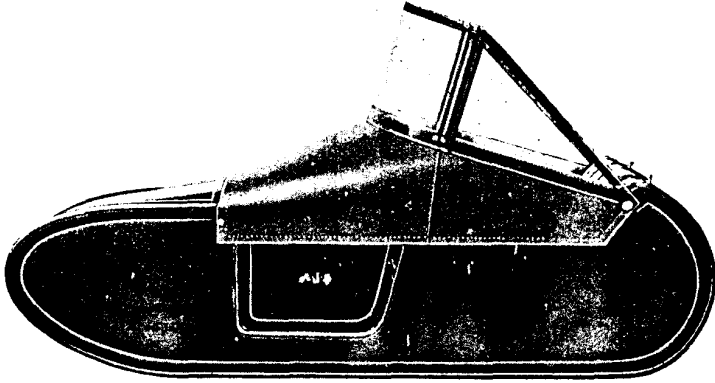

Body Type
and Number stamped
here.
